

EMERGENCY PROCEDURES

S/N 18268312

1983 N5358E Cessna 182R

Bold-faced type are immediate action items which should be committed to memory.

Engine Failure During Takeoff Roll

1. Throttle.....**IDLE**
2. Brakes**APPLY**
3. Wing Flaps **RETRACT**
4. Mixture**IDLE CUT OFF**
5. Ignition Switch **OFF**
6. Master Switch..... **OFF**

Engine Failure Immediately After Takeoff

1. **Airspeed 75 KIAS (Flaps Up)
70 KIAS (Flaps Down)**
2. Mixture**IDLE CUT OFF**
3. Fuel Selector **OFF**
4. Ignition **OFF**
5. Wing Flaps. **AS REQUIRED**
(Full Recommended)
6. Master Switch **OFF**

Engine Failure During Flight (Restart)

1. **Airspeed 75 KIAS**
2. **Carb Heat.....ON**
3. **Fuel Selector BOTH**
4. Mixture **RICH**
5. Ignition **BOTH**
(or START if propeller is stopped)
6. Primer **IN & LOCKED**

Forced Landing w/o Engine Power

1. Airspeed75 KIAS (Flaps Up)
70 KIAS (Flaps Down)
2. Mixture..... **IDLE CUT OFF**
3. Fuel Selector **OFF**
4. Ignition..... **OFF**
5. Wing FlapsAs Required (Full Recommended)
6. Master Switch..... **OFF**
7. Doors**UNLATCH**
8. (prior to Touchdown)
9. Touchdown.....Slightly Tail Low
10. Brakes.....Apply Heavily

Precautionary Landing With Engine Power

1. Airspeed 75 KIAS
2. Wing Flaps 20°
3. Select Field.....Perform Fly Over Inspection
4. Electrical Switches **OFF**
5. Flaps.....Full on Final Approach
6. Airspeed 70 KIAS
7. Avionics & Master Switches **OFF**
8. Doors.....**UNLATCHED**
Prior To Touchdown
9. Touchdown.....Slightly Tail Low
10. Ignition Switch..... **OFF**
11. Brakes.....Apply Heavily

Engine Fire During Start

1. **Continue Cranking Engine**
2. If Engine Starts:..... Power 1700 RPM for a few minutes
3. Engine ... Shutdown and Inspect
- If Engine Fails to Start:**
4. **Throttle FULL OPEN**
5. **Mixture..... IDLE CUT OFF**
6. **Cranking..... CONTINUE**
7. **Fire ExtinguisherOBTAIN**
8. **Master/Ignition/Fuel..... OFF**

9. Fire EXTINGUISH

10. Fire Damage.....**INSPECT**

Engine Fire in Flight

1. **Mixture IDLE CUT OFF**
2. **Fuel SelectorOFF**
3. Master Switch**OFF**
4. Cabin Heat & Air**OFF**
(Except Overhead Vents)
5. Airspeed..... 100 KIAS
(If fire is not extinguished, increase glide speed to find an airspeed which will provide an incombustible mixture.)
6. Forced Landing w/o Engine Power **EXECUTE**

Electrical Fire in Flight

1. **Master Switch.....Off (LEAVE IGNITION ON)**
2. **Avionics Power Switch...OFF**
3. **Vents/Cabin Air/HeatCLOSED**
4. **Fire Extinguisher.. ACTIVATE**

Warning
After discharging an extinguisher within a closed cabin, ventilate the cabin.

5. All Other Switches (Except Ignition).....**OFF**
If fire appears out and electrical power is necessary for continuance of flight:
6. Master Switch**ON**
7. Circuit BreakersCheck for Faulty circuit (Do Not Reset)
8. Radio Switches**OFF**
9. Avionics Power Switch..... **OFF**

10. Radio/Electrical Switches
..On one at a time w/ delay after each until short is localized.

11. Vents/Cabin Air/HeatOpen when it is ascertained that fire is completely extinguished.

Cabin Fire

1. **Master Switch Off (LEAVE IGNITION ON)**
2. **Vents/Cabin Air/Heat.....CLOSED**
3. **Fire Extinguisher ..ACTIVATE**

Warning
After discharging an extinguisher within a closed cabin, ventilate the cabin.

4. Land . As soon as possible and **INSPECT DAMAGE**

Wing Fire

1. **Pitot Heat..... OFF**
2. **Navigation Lights OFF**
3. **Strobe Lights OFF**

Note

Sideslip to keep flames away from the fuel tank and cabin, and land as soon as possible using flaps only as required for final approach and touchdown.

Icing

1. Pitot HeatON
2. Turn back or change altitude to obtain an outside air temp that is less conducive to icing.
3. Pull cabin heat control to full out and rotate defroster control clockwise to obtain maximum defroster airflow.
4. Increase Engine Speed to minimize ice build-up on propeller blades
5. Watch for signs of carburetor air filter ice and apply carburetor heat as required. An unexplained loss of manifold pressure could be caused by carburetor ice or air intake filter ice. Lean the mixture if carburetor heat is used continuously.
6. Plan a landing at the nearest airport. With an extremely rapid ice build-up, select a suitable "off airport" landing site.
7. With ice accumulation of ¼ inch or more on the wing leading edges, be prepared for significantly higher stall speed.
8. Leave wing flaps retracted. With a severe ice build-up on the horizontal tail, the change in wing wake airflow direction caused by wing flap extension could result in a loss of elevator effectiveness.
9. Open left window and if practical scrape ice from a portion of the windshield for visibility in landing approach.

10. Perform landing approach using a forward slip, if necessary, for improved visibility.
11. Approach at 80 to 90 KIAS depending upon the amount of accumulation.
12. Perform a landing in level attitude.

Ditching

1. Radio Transmit **MAYDAY** on 121.5 giving location and intentions and squawk 7700.
2. Heavy Objects Secure (or Jettison If possible)
3. Flaps.....20° to 40°
4. PowerEst. a 300 FPM descent at 65 KIAS.
5. Approach
High winds, heavy seas.....Into the Wind.
Light winds, heavy swellsParallel to swells.

Note

If no power is available, approach at 75 KIAS with flaps up or at 70 KIAS with 10° flaps.

6. Cabin DoorsUNLATCH
7. Touchdown..... Level attitude at established descent rate.
8. Face Cushion at touchdown with folded coat.
9. AirplaneEVACUATE through Cabin doors. If necessary, open window and flood cabin to equalize pressure so doors can be opened.
10. Life vests and raft.....INFLATE

Airspeeds for Emergency Operations

Engine Failure After Takeoff:

Wing Flaps Up -- 75 KIAS
Wing Flaps Down -- 70 KIAS

Maneuvering Speed:

3100 Lbs -- 111 KIAS
2600 Lbs -- 102 KIAS
2000 Lbs -- 88 KIAS

Maximum Glide:

3100 Lbs -- 76 KIAS
2600 Lbs -- 70 KIAS
2000 Lbs -- 61 KIAS

Precautionary Landing With

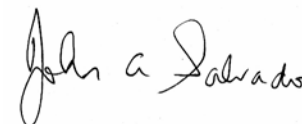

Engine Power -- 70 KIAS

Landing Without Engine Power:

Wing Flaps Up -- 75 KIAS
Wing Flaps Down -- 70 KIAS

This checklist is a guide to coordinate Pilot Operating Handbook and STC data applicable to this particular aircraft only. The applicable Pilot Operating Handbook and STC installations remain the official documentation for this aircraft. The pilot in command is responsible for complying with all items in the Pilot Operating Handbook and applicable STCs.

I certify this checklist has been reviewed for accuracy.

For the _____ 1/06/2006
Wing Director of Maintenance Date

**For all other
Emergency
Abnormal
Procedures.
See the
POH
Section 3.**
